EDUCATION

Electronics Engineering (B. Eng)

University of Nigeria, Nsukka, Enugu (2018-2023)

PROJECTS

1. **BestBuy Ecommerce** (https://bestbuy-ecommerce.vercel.app) – This is a full stack ecommerce web application built with Nextjs, sanity.io CMS and Chakra UI. It also includes stripe for payment processing and checkout.

2. **WorldieChat** (https://worldiechat.web.app) – This is a chat application that allows users from all over the world to send and receive messages. It includes user authentication and color theme switching. It was built with React, styled components and firebase.

3. **Movio Website** (https://movio-v2.netlify.app) – This is an application for searching and viewing information about movies and TV shows. Movies can be added to bookmarks which are saved on the browser with local Storage. It was built using React, redux, styled components and the TMDB API.

4. **Piggyvest Clone** (https://ikennaezef.github.io/piggyvest-clone) – This is a clone of the Piggyvest landing page(https://piggyvest.com). It was built with HTML, SCSS and JavaScript.

5. **QuizWhiz** (https://quizwhiz.netlify.app) – This is a quiz application where you can select the category of questions you want to answer, the number of questions and the difficulty level. It was built with React and Tailwind CSS.
